*VII International Student Research Competition
«THE ECONOMY OF THE FUTURE»,
which is held in the framework of the all-Russian competition of youth projects
among educational institutions of higher education*

At present, the student environment has seen a decline in the scientific and organizational activities of students. The development of the system of higher education calls for the continuous improvement of the research activities of students, through which students have the opportunity to show their individuality and creativity, to realize the acquired knowledge in practice, to feel and demonstrate the readiness for self-realization of the individual.

The purpose of the competition of research works: activation of scientific and organizational activities of students, encouragement of their research activity, identification of worthy projects aimed at studying the dynamics of economic systems, trends and forecasts of their development.

THE ECONOMY OF THE FUTURE is a competition of research works aimed at the formation and development of research and professional competences of participants; development of organizational skills of students participating in the competition; identification of projects that can be further developed or implemented; stimulation of research work of students.

The start of the research competition:

September 1, 2018
Russia, Tambov, Sovetskaya street, 6

Nominations of the competition of research works:

Future staff for the economy – the study of perspective directions of labor market dynamics, the demand for professions, professional competencies, etc.

Technologies of the future and the economy of the company – economic efficiency of the application of new technologies in the activities of firms in various industries, research on the effectiveness of alternative energy sources, electronic systems, process automation, etc.

Regional economy of the future – the economy of smart cities, the economy of using alternative energy sources in the housing and communal services of the region, the technology of regional management, the classification of problems of sustainability of the regional economy in the future.

World economy of the future – globalization, integration, removal of barriers, restructuring of international economic organizations.

Participants of competition of research works

Students of the specialty, bachelor's and master's degrees of higher education, as well as foreign students of educational institutions of higher education.
